U.S. work authorized (H-1B transfer required) | Returned to the U.S. December 2025

SUMMARY

Business Intelligence and Data Analyst with 5+ years of experience developing Tableau and Power BI dashboards, performing SQL-based analysis, and delivering validated reporting solutions across logistics, nonprofit, financial services, consulting, and higher education. Experienced in analyzing complex, multi-source datasets, identifying trends, anomalies, and data-quality issues, translating stakeholder requirements into KPI solutions, and communicating actionable insights to technical and nontechnical audiences

TECHNICAL SKILLS

BI & Visualization: Tableau Desktop, Tableau Server, Tableau Dashboard Development, Power BI, DAX, Power Query, Power BI Service, Semantic Models, Dataflows Gen2, Dashboard Design, Data Visualization, KPI Reporting, Operational Reporting, Excel

Data Analysis: SQL, Python, pandas, Exploratory Data Analysis, Trend Analysis, Anomaly Analysis, Data Profiling, Data Validation, Data Cleaning, Ad Hoc Analysis

Data Management: PostgreSQL, SQL Server, Oracle, Teradata, MySQL, ETL, Data Warehousing, Dimensional Modeling, Star Schema, Data Quality

PROFESSIONAL EXPERIENCE

Data Analyst | FedEx Express Transportation & Supply Chain Services | Mumbai, India Feb 2025 – Nov 2025

- Identified \$65K+ in pricing discrepancies through SQL analysis and Power BI KPI dashboards, partnering with Sales to resolve account-level issues
- Built Power BI dashboards and semantic models using DAX and RLS, providing team-level views for managers and organization-wide reporting for VPs
- Built Power BI Dataflows integrating Oracle, Teradata, and Excel data with scheduled refreshes through Power BI Service
- Gathered reporting requirements from U.S. stakeholders and collaborated with a four-member team to develop and validate reporting solutions

Quant/Data Analyst | Equentis Wealth Advisory Services Limited | Mumbai, India Jun 2024 – Jan 2025

Senior Data Analyst | Connecticut Coalition to End Homelessness | Hartford, CT Feb 2023 – Mar 2024

- Built interactive Tableau dashboards using SQL Server and Excel data to analyze trends, housing outcomes, and operational performance
- Identified and resolved duplicate, incomplete, and inconsistent records across 2M+ HMIS records, improving data quality for downstream reporting
- Automated Tableau dashboard refreshes, reducing manual reporting effort by 70%, enabling independent multi-year trend analysis
- Gathered stakeholder requirements and completed 150+ ad hoc SQL requests, delivering validated datasets using Excel analysis

Data Visualization Developer (Part-time) | Office of Deans, NJIT | Newark, NJ Mar 2022 – Dec 2022

- Cleaned and validated Excel-based student data using Python and built Tableau dashboards to analyze enrollment, coursework progress, and demographic trends
- Published and maintained Tableau dashboards on Tableau Server, supporting administrator access to recurring academic reporting
- Gathered reporting requirements from the Dean, translated academic needs into Tableau views, and presented findings in weekly stakeholder reviews

GRC Data Intern (Internship) | Wolters Kluwer | New York City, NY May 2022 – Aug 2022

- Built a consolidated Tableau dashboard integrating Oracle, SQL Server, and Excel data across 7 business units for customer attrition and data-volume analysis
- Analyzed customer behavior, data volumes, and attrition patterns to identify trends and actionable insights, presenting findings to VPs across seven business units

Associate Software Engineer | Accenture Solutions | Mumbai, India Aug 2019 – Dec 2020

- Built ETL pipelines using Informatica PowerCenter and validated target data for downstream application use
- Performed SQL-based data testing and validation using Hive and Teradata to identify discrepancies and verify source-to-target accuracy
- Supported a 500TB+ Teradata-to-Hive migration by reconciling source and target datasets and investigating data discrepancies
- Developed and executed test scripts to validate application functionality, document defects, and verify fixes with developers

BI & ANALYTICS PROJECTS

Project Atlas: Data Warehouse & Analytics Platform PostgreSQL, Python, SQL	Dec 2025 – Present
- Designed a PostgreSQL star-schema warehouse with conformed dimensions across 16 business domains - Profiled and validated 1.97M+ records using Python and SQL to identify duplicates, anomalies, and data-quality issues - Developed reusable SQL queries and KPI views to analyze trends across sales, production, financial, inventory, and sustainability - Developing Tableau and Power BI dashboards to communicate operational trends, KPIs, and actionable cross-domain insights	

EDUCATION

M.S., Data Science New Jersey Institute of Technology, Newark, NJ	Jan 2021 – Dec 2022
M.Sc., Computer Applications University of Mumbai, Mumbai, India	Aug 2016 – May 2019

CERTIFICATIONS

Power BI Data Analyst Associate (PL-300) – In Progress
Google Data Analytics Professional Certificate
